Daye offers world competitive and profitable solutions

Based on the idea of mutual benefit Daye is ready to co operate with any company anywhere in the world with the appreciation of the fact that it has to sell products with higher quality and competitive prices than that of the rival companies and the need to lower its prices to a reasonable levels by increasing the productivity and effectiveness of its production. You can find the details of our work techniques and the product range, the result of our endeavours and efforts to become a source that can supply the finest products for the worth of the money paid for the firms of all small, medium and large sizes in which we have tried to include clearly all the information about our production stages, the technical details of our products and our commercial terms.

About the Company of Daye

The company has been established in 1986 for internal and international business activities. Over the past years the company acquired a considerable experience related with production, distribution, import and export. Beside its past successes the company gives more importance to the future and understands the conditions of integration with the world markets, and is taking and showing all the necessary measures and endeavours on the road become a fully international company. It has a flexible and an adaptable structure which can compete in the global economies of **today's world, giving** importance to its customers, shareholders, employees, suppliers and a culture with an outward not inward looking mentality which is open to new developments.

Daye has been continuously updating itself for the "right service, right product " configuration since its establishment date, not by day dreaming but trying to build a company for the future with an emphasis not so much on profits but on the customer service and even the markets, preparing " high quality-reasonable cost" products for them with an understanding of the customers channels.

About Product

It is thought that the most important mining material of the Anatolia is probably Turkish Marble. It has been mining, **dressing, decorating for centuries and exporting all over the world. Turkish people know it's required all processing** steps very well.

The marble is comes from the centre section of north Anatolia and its plentiful quarries to the factory for dimensioning. The distance is not more than one hour by lorry. The easy work structure of quarries, well organized factory and their closeness give to us an occasion for offering to you a product with reduced cost of production.

Planning

Production stages start with the planning of the production inputs in accordance with the customer demands and market requirements. The most important things in the marble works is the quality. The selection of the marble and working principles of maximum output, lowest cost, on time delivery where the tile is placed come first in the most important considerations of Daye. In-house process planning results in reliable production at minimum cost, low reject rates and ultimate quality.

Production

The production inputs of raw materials, marble blocks used in the production by selected our experts and purchased from the quarries accordingly the years of experience in the technology of production and trading. Those blocks are processing in the factory for today's requirements shapes with an effective way. Those materials with their saw cutting works completed are surface finished adapting the specific demands. The quality control at our **production style is not a process before shipment. It's a continual double works in every level of the business. When** the works on all materials are completely finished then they are packed for shipment to the consignee. We carefully and securely package these marble tiles to ensure safe delivery anywhere in the World.

Marketing

The modern construction technology demands the highest requirements to the producers of marble. The product of Daye satisfy these requirements. The Daye Marble Division associates with a culture based on flexibility in all aspects, listening to the client, the highest level of professionalism, offering intelligent solutions for a wide range of applications.

You are able to buy easy installation & durable products with the moderate cost

The first grade marble Tiles from Turkey

The expertise of Daye is specifically targeted to optimization of raw materials and results to meet the needs of each client: the finest quality product, the best integration in the application process and the most cost—effective solution.

The Beige fashionable marble from Turkey is all you'll need
